

Target Test Non Calculator 4

Mark Scheme

NOTES ON MARKING PRINCIPLES

1 **Types of mark**

M marks: method marks

A marks: accuracy marks

B marks: unconditional accuracy marks (independent of M marks)

2 **Abbreviations**

cao – correct answer only

ft – follow through

isw – ignore subsequent working

SC: special case

oe – or equivalent (and appropriate)

dep – dependent

indep - independent

3 **No working**

If no working is shown then correct answers normally score full marks

If no working is shown then incorrect (even though nearly correct) answers score no marks.

4 **With working**

If there is a wrong answer indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

If working is crossed out and still legible, then it should be given any appropriate marks, as long as it has not been replaced by alternative work.

If it is clear from the working that the “correct” answer has been obtained from incorrect working, award 0 marks. Send the response to review, and discuss each of these situations with your Team Leader.

If there is no answer on the answer line then check the working for an obvious answer.

Any case of suspected misread loses A (and B) marks on that part, but can gain the M marks. Discuss each of these situations with your Team Leader.

If there is a choice of methods shown, then no marks should be awarded, unless the answer on the answer line makes clear the method that has been used.

5 **Follow through marks**

Follow through marks which involve a single stage calculation can be awarded without working since you can check the answer yourself, but if ambiguous do not award.

Follow through marks which involve more than one stage of calculation can only be awarded on sight of the relevant working, even if it appears obvious that there is only one way you could get the answer given.

6 Ignoring subsequent work

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question: e.g. incorrect canceling of a fraction that would otherwise be correct

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect e.g. algebra.

Transcription errors occur when candidates present a correct answer in working, and write it incorrectly on the answer line; mark the correct answer.

7 Probability

Probability answers must be given as fractions, percentages or decimals. If a candidate gives a decimal equivalent to a probability, this should be written to at least 2 decimal places (unless tenths).

Incorrect notation should lose the accuracy marks, but be awarded any implied method marks.

If a probability answer is given on the answer line using both incorrect and correct notation, award the marks.

If a probability fraction is given then cancelled incorrectly, ignore the incorrectly cancelled answer.

8 Linear equations

Full marks can be gained if the solution alone is given on the answer line, or otherwise unambiguously indicated in working (without contradiction elsewhere). Where the correct solution only is shown substituted, but not identified as the solution, the accuracy mark is lost but any method marks can be awarded.

9 Parts of questions

Unless allowed by the mark scheme, the marks allocated to one part of the question CANNOT be awarded in another.

10 Money notation

Accepted with and without the “p” at the end.

11 Range of answers

Unless otherwise stated, when any answer is given as a range (e.g. 3.5 – 4.2) then this is inclusive of the end points (e.g. 3.5, 4.2) and includes all numbers within the range (e.g. 4, 4.1).

Question	Working	Answer	Mark	Notes
1	$15 \div 10$ 80×1.5 60×1.5 30×1.5 36×1.5	120, 90, 45, 54	3	M2 for any one of $80 + 40$ or $60 + 30$ or $30 + 15$ or $36 + 18$ or 120 or 90 or 45 or 54 seen A1 cao OR M1 for $15 \div 10$ or $3 \div 2$ or sight of 1.5 M1(dep) for $80 \times '1.5'$ or $60 \times '1.5'$ or $30 \times '1.5'$ or $36 \times '1.5'$ A1 cao OR M1 for $80 \div 10$ or $60 \div 10$ or $30 \div 10$ or $36 \div 10$ or 8 or 6 or 3 or 3.6 M1(dep) for $'8' \times 15$ or $'6' \times 15$ or $'3' \times 15$ or $'3.6' \times 15$ A1 cao OR M1 for $80 \div 2$ or $60 \div 2$ or $30 \div 2$ or $36 \div 2$ or 40 or 30 or 15 or 18 M1 (dep) for $'40' \times 3$ or $'30' \times 3$ or $'15' \times 3$ or $'18' \times 3$ A1 cao
2	(a)	Positive correlation	1	B1 for positive correlation or as the number of pages increases the time taken increases or the longer the book the more time it takes to read oe
	(b)	7.5	2	M1 for line of best fit drawn between (50, 2) and (50, 4) and (200, 9) and (200, 11) A1 for 6.5 – 8.5
3	(i)	55	1	B1 cao
	(ii)	Corresponding angles	1	B1 for corresponding (angles), accept F angles

1380_3H				
Question	Working	Answer	Mark	Notes
4	$\frac{7 \times 20}{0.5}$	280	3	M1 for any two of 7, 20 and 0.5 seen or 140 or 40 or 14 M1 for 14×20 or $\frac{140}{0.5}$ or 7×40 or 7.2×40 or $144 \div 0.5$ or 140×2 A1 for 280 – 300
5	(a)(i) $5 \times (-2)^2 + 2$ $= 5 \times 4 + 2$	22	1	B1 cao
	(ii) $47 - 2 = 45$ $45 \div 5 = 9$	3	2	M1 for $\frac{47 - 2}{5}$ or $\frac{47 + 2}{5}$ A1 for 3 or -3 (accept ± 3)
	(b)	-1, 0, 1, 2, 3	2	B2 cao (B1 for at least 4 correct and not more than one incorrect integer)
6	$360 \div 30$	12	2	M1 for $360 \div 30$ A1 cao
7	(a)	Reflection	2	B2 for vertices of shape plotted at (-3, 2), (-3, 3), (-5, 3), (-6, 2.5), (-5, 2) (B1 for a reflection in any vertical or horizontal line)
	(b)	Translation; $\begin{pmatrix} -6 \\ -1 \end{pmatrix}$	2	B1 for translation B1 (indep.) for 6 left and 1 down OR $\begin{pmatrix} -6 \\ -1 \end{pmatrix}$ Note B0 if more than one transformation given

1380_3H					
Question		Working	Answer	Mark	Notes
8	(a)		Question + response boxes	2	B1 for an appropriate question with a specific time frame e.g. each day B1 for at least 3 non-overlapping boxes. Do not accept inequalities N.B. Do not accept frequency tables or data collection sheets
	(b)		e.g. biased (sample)	1	B1 for a correct reason, e.g. biased (sample) or more likely to exercise more oe
9	(a)		4, 7	1	B1 cao
	(b)		$4n - 3$	2	B2 cao (B1 for $4n + a$ or $n = 4n - 3$)
10		$(7 \times 2 + 2 \times 5) \times 200 = 4800$ 4800×8	38 400 g	5	M1 for 7×2 or 2×5 or 7×7 or 5×5 or 2×2 M1 for “ 7×2 ” + “ 2×5 ” oe or “ 7×7 ” – “ 5×5 ” M1 (dep on 1 st M) for ‘24’ \times 200 or ‘0.0024’ \times 2 M1 for ‘4800’ \times 8 or ‘0.0048’ \times 8 000 000 or ‘0.0048’ \times 8000 A1 for 38 400g or 38.4kg SC B3 for any answer including digits 384
