Instructions

- Use black ink or ball-point pen.
- Fill in the boxes at the top of this page with your name, centre number and candidate number.
- Answer all questions.
- Answer the questions in the spaces provided — there may be more space than you need.
- Calculators may be used.
- If your calculator does not have a π button, take the value of π to be 3.142 unless the question instructs otherwise.
- Diagrams are NOT accurately drawn, unless otherwise indicated.
- You must show all your working out.

Information

- The total mark for this paper is 80
- The marks for each question are shown in brackets — use this as a guide as to how much time to spend on each question.

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.
Answer ALL questions.

Write your answers in the spaces provided.

You must write down all the stages in your working.

1 Write 6819 to the nearest 1000

(a) How long should the 06 58 train from Swindon take to get to London?

Arrives at 08 02

1 hr 4 mins

Clare says,

“All these trains take more than one hour to get from Swindon to London.”

(b) Is Clare correct?

You must give a reason for your answer.

No. The 07 17 gets in at 08 14, (under an hour)

7 Tracy buys

2 coffees at £1.10 each
3 teas at 95p each
5 sandwiches at £2.15 each

Tracy shares the total cost equally between 5 people.

How much does each person pay?

\[
\begin{align*}
2 \times 1.10 & = £2.20 \\
3 \times 0.95 & = £2.85 \\
5 \times 2.15 & = £10.75 \\
Total & = £2.20 + £2.85 + £10.75 \\
& = £15.80 \\
\frac{15.80}{5} & = £3.16
\end{align*}
\]

£3.16

(a) Which type of fruit is the mode?

In Rachel’s survey, 2 out of 10 people like apples best.

(b) Write 2 out of 10 as a percentage.

\[
\frac{2}{10} \times 100
\]

\[20\%\]
Pete also carried out a survey to find out the type of fruit people like best. He asked 30 people which type of fruit they like best.

He drew this pie chart for his results.

A smaller proportion of people like bananas best in Pete’s survey than in Rachel’s survey.

(c) Explain how Pete’s pie chart and Rachel’s table show this.

Half of the people in Rachel’s survey liked bananas best. This is a greater proportion than Pete’s survey because half would be half of the pie chart. (180°) (2)

9 The smallest angle of a triangle is 25°
The triangle is enlarged by scale factor 3

Ben says,

"The smallest angle of the enlarged triangle is 75° because 25 \times 3 = 75"

Is Ben right?
Explain your answer.

No. The lengths will be bigger but the angles do not change.

</tr>
</tbody>
</table>

Ellie has 250 grams of sugar and 550 grams of dark chocolate. She assumes that she has plenty of lemon juice and plenty of eggs.

(a) What is the greatest number of people Ellie can make chocolate mousse for?
You must justify your answer.

Sugar

- 40g for 2 people
- 20g for 1 person

\[
\frac{250}{20} = 12.5
\]

12 people.

DARK CHOC.

- 110g for 2 people
- 55g for 1 person

\[
\frac{550}{55} = 10
\]

10 people.

Ellie can only make mousse for 10 people, she only has enough dark chocolate to make mousse for 10.

Ellie only has 6 eggs.

(b) What effect would this have on the greatest number of people Ellie can make chocolate mousse for?

Yes. 6 eggs would mean she can only make 6 mousses.
